

## LPN Clinical Homework Assignment

Family & Children's Services – Mental Health / Crisis Intervention

Student Name:

Clinical Date(s):

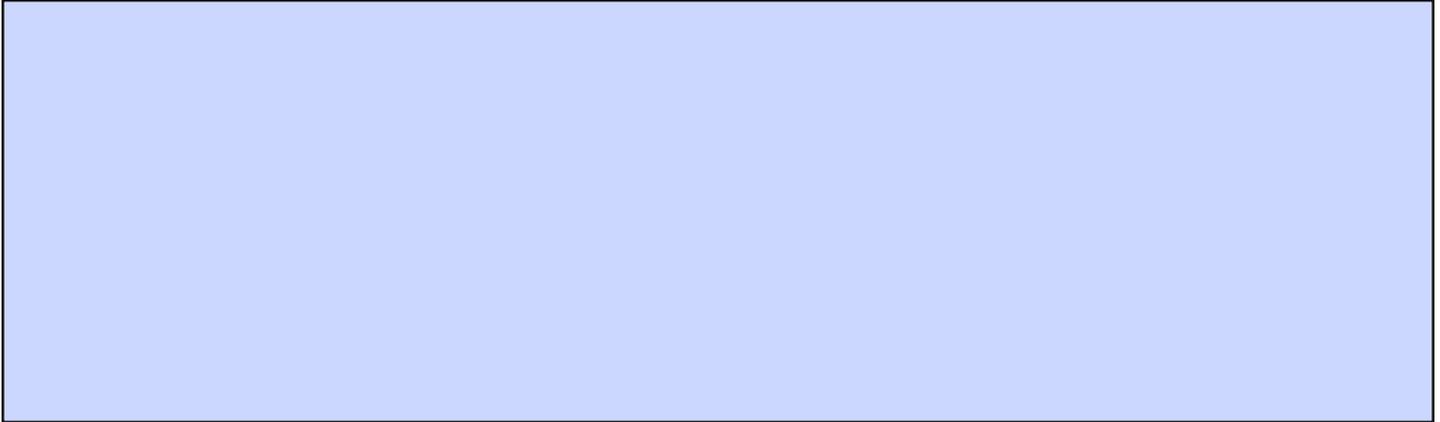

Instructor:

### Part I: Overview of the Clinical Day

Describe the facility, population served, and the overall focus of patient care during your shift.

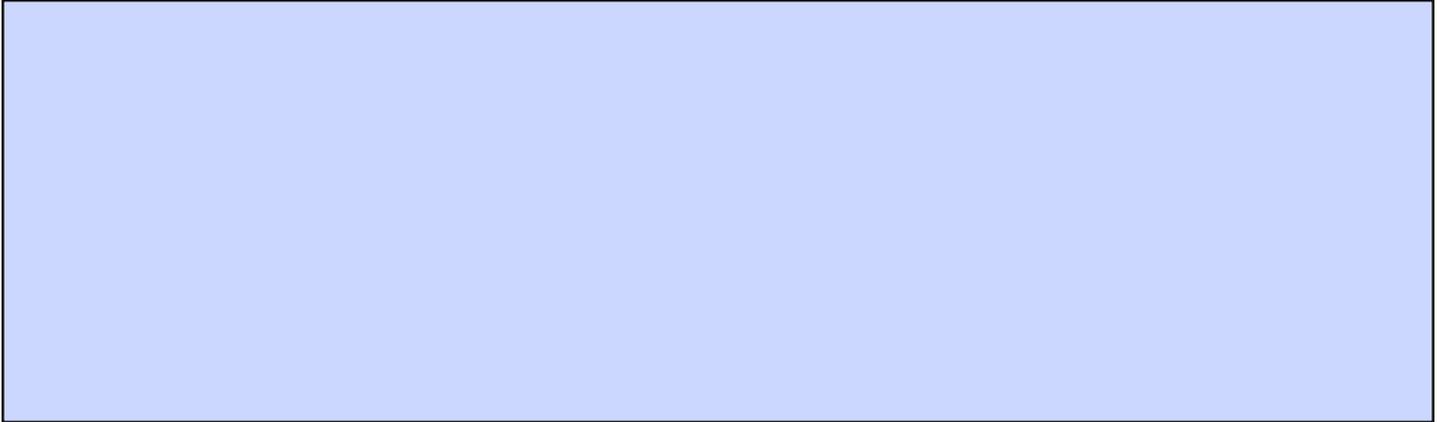

**Part II: Medication Room Nurse**

Describe the department, responsibilities, medications observed, safety checks, and how this role supports patient safety.

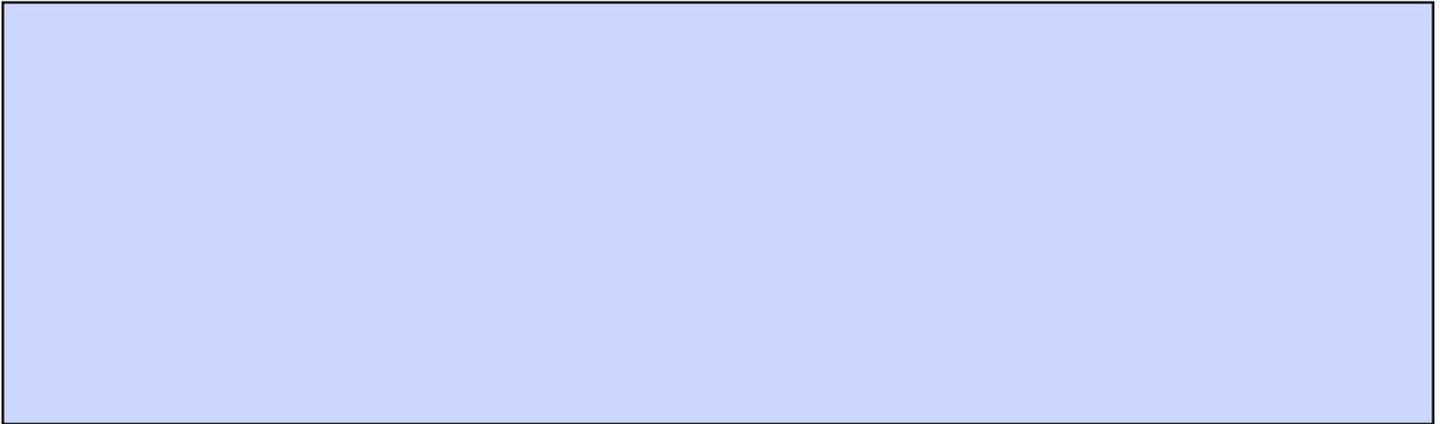

**Part III: Crisis Stabilization Nurse**

Describe patient situations observed, assessments performed, de-escalation techniques, and safety interventions.

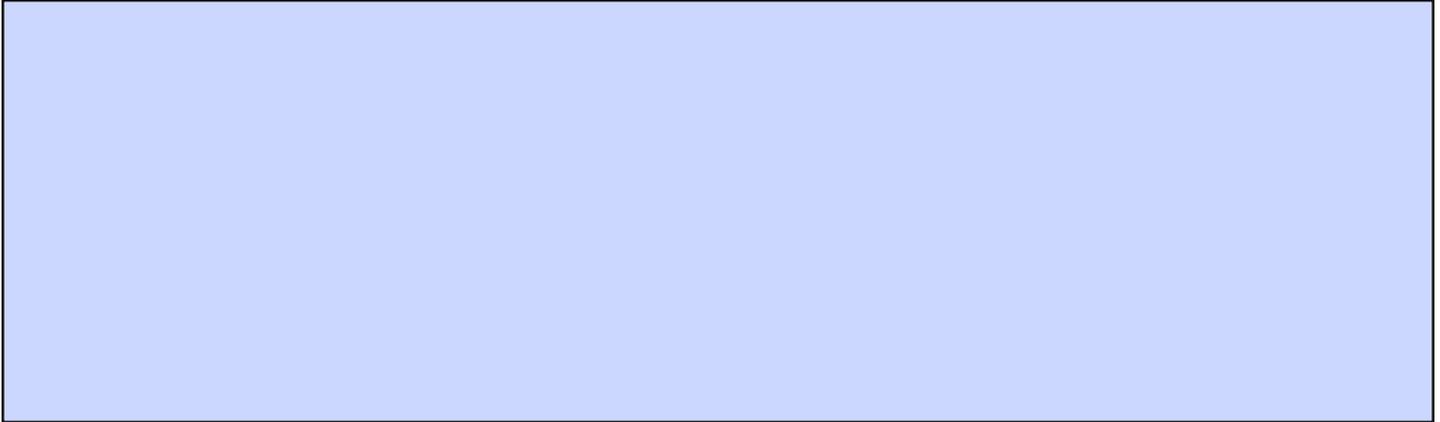

**Part IV: In-Patient Nurse**

Describe ongoing care provided, continuity of care, and how this role supports long-term stabilization.

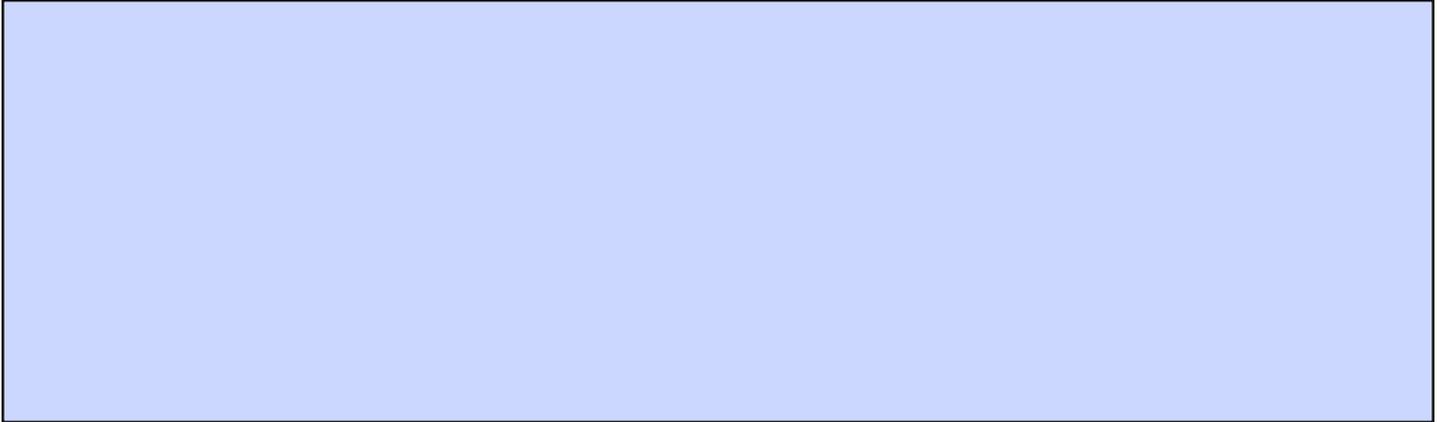

**Part V: Safety & Milieu Management**

Identify at least two safety measures observed and explain why they are important for patients and staff.

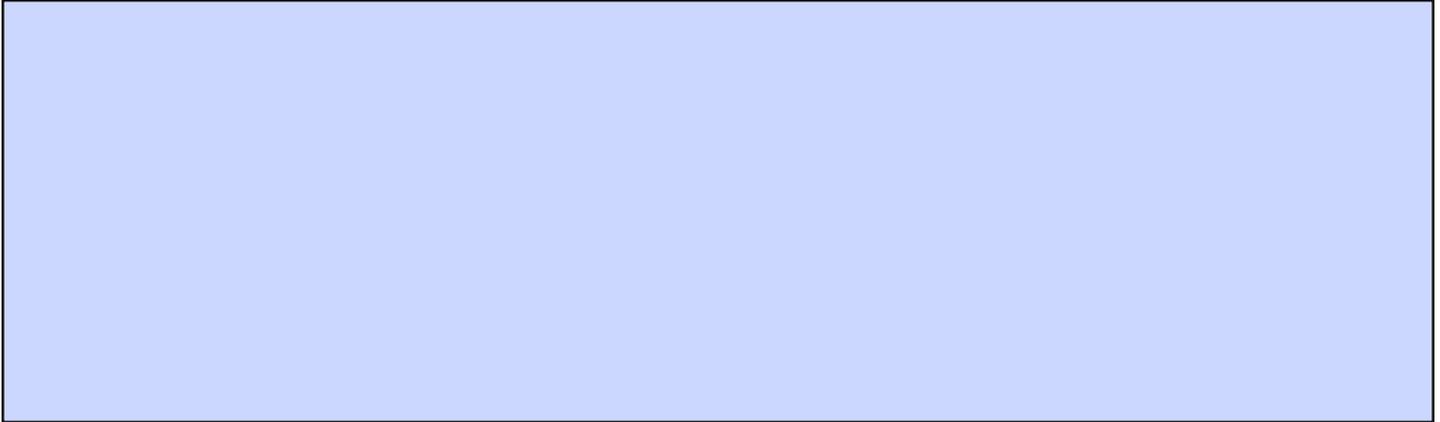

**Part VI: Interdisciplinary Team Involvement**

Identify team members observed and explain how nurses collaborate to support patient care.

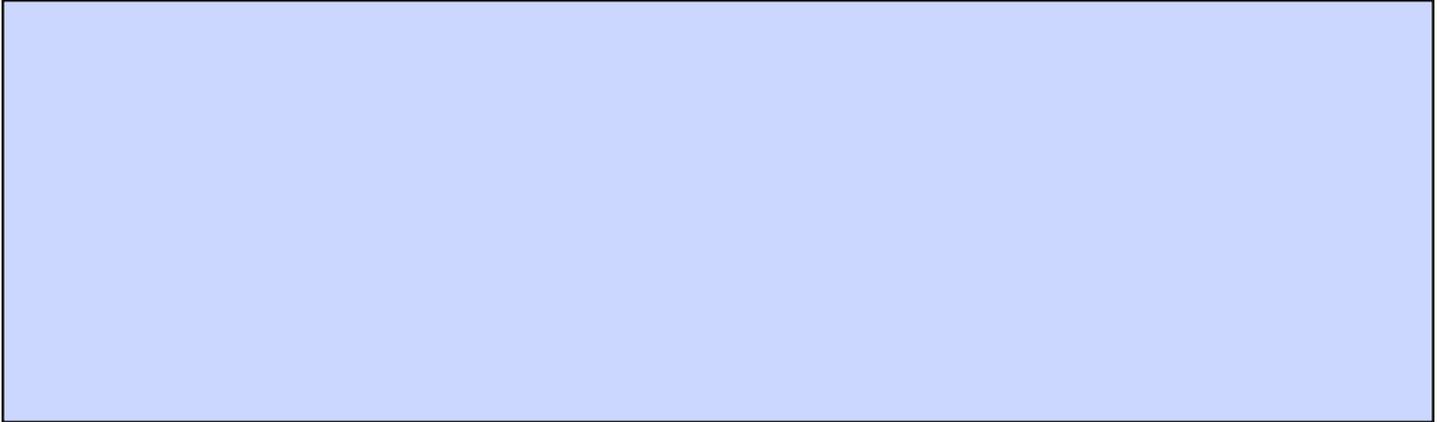

**Part VII: Therapeutic Communication**

Describe a therapeutic communication interaction and techniques used (active listening, validation, open-ended questions, etc.).

**Part VIII: Reflection**

Describe the best and most challenging part of your clinical day and what you learned.

**Part IX: Learning Takeaway**

Identify one key learning from this experience that will help you in future nursing practice.
