

## Central Tech PN Clinical Homework Assignment (Urgent Care Skills-Based)

Instructions: Upload into Moodle by 0900 the day after the urgent care clinical for full points.

---

1. Describe the procedures or skills you performed or observed (e.g., swabs, IV insertions, wound care, injections, EKGs). Include the purpose of each procedure and any patient teaching that occurred.

2. Describe any medications you administered or observed being given. Include the route, indication/purpose, and any education provided to the patient.

3. Describe the patient assessments you conducted or assisted with (vital signs, focused exams, etc.). Explain what the findings indicated and how they guided care.

## Central Tech PN Clinical Homework Assignment (Urgent Care Skills-Based)

Instructions: Upload into Moodle by 0900 the day after the urgent care clinical for full points.

---

4. Summarize any diagnostic tests or lab collections performed and your role in the process. Include the purpose of the test and how results impacted care if known.

5. Describe any patient education or discharge instructions you provided or observed. Include the topic and key teaching points discussed.

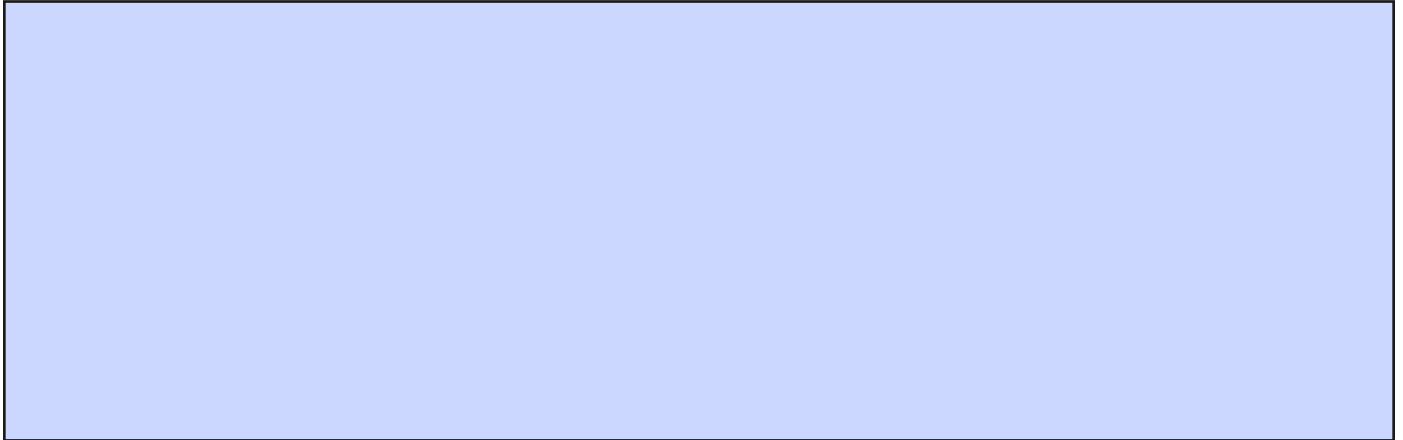

6. Discuss infection control practices you observed or participated in (hand hygiene, PPE, isolation precautions). Explain their importance in the urgent care setting.
